EDUCATION

SR University, Hanamkonda, Telangana

Aug 2023 – May 2027

Bachelor of Technology in Computer Science & Engineering | CGPA: 7.1 / 10

TECHNICAL SKILLS

Programming Languages: Java, Python, SAP ABAP, JavaScript (Basic), SQL

Web Technologies: React.js, Node.js, Express.js, Flask, HTML, CSS, RESTful APIs

Databases: MySQL, PostgreSQL, MongoDB

AI & Machine Learning: TensorFlow, Keras, Scikit-learn, CNN, Deep Learning, OpenCV

Cloud & Deployment: Microsoft Azure AI Fundamentals, Vercel

Tools & Practices: SAP GUI, ABAP Workbench, Git, GitHub, VS Code, Jupyter Notebook, Agile, Scrum

PROFESSIONAL EXPERIENCE

Java Full Stack Developer Intern

Jan 2026 – Mar 2026

EduSkills Foundation (Remote) — Java, Spring Boot, React.js, MySQL, RESTful APIs

- Architected 3 production-grade full-stack applications with multi-threaded backend services, implementing concurrency and synchronization mechanisms that improved system throughput by 40% — direct experience monitoring and tuning system performance metrics.
- Designed and integrated REST APIs for CRUD operations and secure data exchange, reducing average API response time by 30% through systematic performance analysis, comparable to tracking latency and throughput KPIs in a network environment.

Artificial Intelligence and Machine Learning Intern

Jul 2024 – Sep 2024

EduSkills Foundation (Remote) — Python, TensorFlow, Keras, Scikit-learn, Flask

- Built and trained 5+ machine learning models processing datasets exceeding 10,000 records, delivering predictive analytics solutions with measurable business outcomes — core data analysis and reporting experience.
- Conducted systematic feature engineering, preprocessing, and performance analysis to debug models, improving accuracy by 20% and reducing error by 15%, demonstrating the analytical rigor needed to track and improve network KPIs.

PROJECTS

Bone Fracture Detection System

Dec 2025

Python, TensorFlow, CNN, Flask, OpenCV, Deep Learning — [Live Demo](#) | [GitHub](#)

- Trained a CNN-based system on 5,000+ medical images, achieving 92% classification accuracy and reducing false positives by 18% through iterative debugging and performance analysis.
- Deployed a scalable, cloud-hosted inference application via Flask REST APIs supporting 100+ concurrent users, with continuous performance monitoring.

Movie World

May 2026

React.js, Node.js, Express.js, MongoDB, RESTful APIs — [Live Demo](#) | [GitHub](#)

- Built a full-stack streaming platform handling 500+ concurrent requests; integrated third-party REST APIs for real-time content aggregation, improving response performance by 35%.
- Built a scalable **Movie World** web application using React.js, Node.js, Express.js, and MongoDB, featuring movie search, user authentication, watchlists, reviews, and real-time movie information.

Student Management System (SAP ABAP)

Jul 2026

SAP ABAP, SAP GUI, Data Dictionary — [Live Demo](#) | [GitHub](#)

- Developed a Student Management System using SAP ABAP to manage student records, including registration, updates, deletion, and search functionalities.
- Designed custom database tables using the ABAP Data Dictionary and implemented CRUD operations with validation to ensure data accuracy.

CERTIFICATIONS & ACHIEVEMENTS

- [Microsoft Certified: Azure AI Fundamentals \(AI-900\)](#)
- [3rd Place — Project Expo 2023](#)
- [UDBHAVA X'26 — 12-Hour Multi-Domain Hackathon Participant](#)
